

FX INTERNATIONAL INTERIOR DESIGN AWARDS

Der FX Interior Design Award ist eine jährlich vergebene Auszeichnung des FX magazine, dem laut eigener Aussage, erfolgreichsten Magazins für Inneneinrichter und Objektgestalter. Eine Jury aus über 20 Architekten, Designern, Ingenieuren und Verbrauchern bewertet die eingereichten Bewerbungen. Zugelassen sind Werke, die in den letzten zwei, dem Wettbewerb vorangegangenen Jahren, geschaffen wurden.

Angesichts der Tatsache, dass das FX magazine von sich behauptet, das kompetenteste Magazin seiner Ausrichtung zu sein, ist die Bedeutung des FX Interior Design Award entsprechend hoch.

Surfaces

Winner

Freestile by Chroma Global Flooring Solutions

Freestile is a new concept in carpet design, created by taking a 2m x 2m large scale design template and cutting it into 50 traditional carpet modules. The modules are installed at random intervals to create a continuous design transition that directly adapts from the original and is site-specific.

Freestile is available in 10 styles, each with four colour boxes producing a palette of 64 options. The high colour intensity is achieved by a unique printing process incorporated into a heavily developed high-tech, woven yarn construction.

Rug formats and customised designs are also available.

The judges said...

"Nice simple concept - functional result"

Finalists & judges' comments

Desert AirMaster by DESO
"Appears to address a human issue with innovative technology"

Digital Change by Heteroflex
"A sophisticated interpretation of digital design with thought given to transitioning from one surface to another"

SKYNET by Eric Liu International
"Beautiful surface design and being familiar with the built suits the environment. Fans excited to see some ceiling sculpture (SD) included in here"

Patternettes for Rug Culture by Patternettes
"Bold, original, artistic and beautiful"

Formica Reflect by Formica Design
"The new site fingerprint and announcing surface with skill"

CHROMA wins with Freestile

Sponsored by [Surface Design Show](#)

Freestyle is a new concept in carpet design, created by taking a 2m x 2m large-scale design template and cutting it into 16 traditional carpet modules. The modules are installed at random intervals to create a continuous design transition that cleverly adapts from the original and is interchangeable.

Freestyle is available in 16 styles, each with four colour tones producing a palette of 64 options. The high colour intensity is achieved by a unique printing process impregnated into a newly developed, high-tech, woven yarn construction.

Rug formats and customised designs are also produced.
